Welcome

FALL FEST

ANNUAL PRODUCTION SALE

We would like to give our consignors a GREAT BIG THANK YOU, without them these sales would not be possible.

Both the ETSSA, which is the oldest area Association in Texas, and HOTSSA are steeped with a long-standing tradition of producing top quality cattle that will perform in any type of herd that a producer might have. Our two Associations represent some 2000 head of cattle. We are continuing our thought process, which is to honor a different breeder each year. These programs have stood the test of time and through their diligence and hard work have not only had an impact on the breed but also on the beef industry.

HOSTED BY EAST TEXAS SIMMENTAL/SIMBRAH HEART OF TEXAS SIMMENTAL/ SIMBRAH ASSOCIATIONS

SALE DAY NUMBERS

Keith Strack: 281-455-5896

Justen Stark: 903-355-8070

Warren Garrett: 903-316-2889

Kenneth Airheart: 903-539-1666

AUCTIONEER

Greg Clifton: 817-313-5250

HOTEL INFORMATION:

**Holiday Inn Express, 300 N Kilgore Drive,
Henderson TX: 903-657-5250**

Baymont Inn, 410 Hwy 79 South, Henderson, TX: 903-657-7900

TERMS AND CONDITIONS: All cattle sell under the suggested Terms and Conditions of the American Simmental Association and are available at www.simmental.org.

Texas is officially classified as free of Brucellosis and TB

LIABILITY: All persons who attend the sale do so at their own risk. Neither the consignors nor the management assume liability legal or otherwise, for any accident that may occur.

This year's honoree is the Guerra family of La Muneca Cattle Company. They have bred, raised, promoted and advanced every breed in Simgenetics, and supported the next generation of breeders. Thank you, La Muneca, for all that you have done and continue to do.

*Thank You,
Keith, Justen and Kenneth*

1 5RTW GINGER MAY

TATTOO: N01 | ASA#: 4609538 | DOB: 6/13/2025 | S | WHITSON IV, CARL

SIRE	RHF/SA KIOWA #4207077	{	HAGAN ARAPAHO 550A ESTES ESPRESSO E336
DAM	RHF/SA LADY MAY #4252140	{	ROLLING HILLS FORTRESS RHF/SA GEORGIA DARLING

BW: 77 | 5/8 SM 3/8 BR

5RTW GINGER MAY, is a daughter to LADY MAY, a PB Simbrah out of RHF/SA KIOWA, a son of Hagan Arapaho out of ESTES ESPRESSO that traces back to RX Genetics from Sally Buxkemper. If you follow the pedigree on MISS SHINNERY FLECK H36; you will find a host of Fleckvieh genetics: ABR SIR ARNOLD G809, SIGFRIED, UPSPTING, BOLD, BOLD LEADER and the legendary ADRAHAN FENELLA. Stop and study your lesson here because you won't see too many for sale with this amount of Fleckvieh genetics that anchors this pedigree.

Ginger May sells open to breed to the bull of your choice to make PB Simbrah's or $\frac{3}{4}$ Simbrahs.

DAM	RHF/SA GEORGIA DARLING #4154720	{	KIMBO 114 D 471/9

BW: 69 | 5/8 SM 3/8 BR

RHY/SA LADY MAY is a polled PB Simbrah that is stacked full of red meat and capacity, A double bred Drean On Meyers Ranch 734 female which gives you the functionally that is so hard to put together in a pedigree, sound feet and legs, strong topped, natural thickness through the hind quarter and that feminine set of shoulders that blends it all together in a total package. All these Simmental generics are anchored by LMC Simbrah genetics, which gives you maternal and top 30% for API.

Lady May sells bred to FTA GOLD RUSH 24L, that will add power to this maternal pedigree, but will not hurt milk, MWW, DOC, Marb and API. The calf will be $\frac{3}{4}$ Simmental and $\frac{1}{4}$ BR that will work well back on a PB Simbrah bull.

BW: 67 | 5/8 SM 3/8 BR

MCR Millicent N31 is the half-sister to MCR Harlow N68 sharing the same sire LMC BBS Pappo's Answer. Her grand sire on the dam's side goes back to the great LMC Red Alert 5k/35.

Millicent's dam is an F model and has produced 8 calves in 5 years by producing twins twice in 3 years. Even with that load, her average weaning weight on all 8 calves is 635 lbs. which is a testament to her milking ability and superior mothering ability. Our herd is built on fertility and this fine heifer is built to produce.

BW: 68 | 5/8 SM 3/8 BR

MCR Juliette N41 is a dark red black nose & feet, deep bodied power house of a young heifer. She is sired by our PRR 11H herd sire who produces heavy milking watchful momma cows. On her dam side, she is the granddaughter of our solid red heavy hitter Smith McCrary Fireball. He has consistently produced many fertile off spring which we love to keep in our herd. Juliette's dam, Red Jelly Bean H406 has a commendable record with us producing two very nice heifers and one steer calf. Her calves average weaning weight is 600 lbs. Juliette carries a 92.5 API and promises a life time of solid production.

#3824147 MCR DAISY OPTIMUM E22

BW: 68 | 205 WT: | 5/8 SM 3/8 BR

MCR Harlow N68 is one of two half-sisters in this season's offering sired by the grandson La Muneca's famous LMC LN Polled Pappo. Her grand dam is the renown BBS Jennie Walker.

On the dam side Daisy was sired by our MCX Maximus herd sire we brought back from Georgia several years ago from the buyout of Mossy Creek herd from our good friend Kevin Kent.

Daisy's dam had her first calf in the spring. So, we held her back to match our fall calving season and since then she has produced consecutive calves in October.

She is extra-long, beautiful udder potential, perfect black nose & feet and the pedigree to be a long-time money maker.

This is a $\frac{3}{4}$ x $\frac{1}{4}$ Simbrah cow sired by the Saint John Gatton bull, and her dam is the K348 cow selling here at Fall Fest. M723 has a perfect udder, sound feet and legs, and a great disposition. She calved at 24 months with a beautiful red blaze, $\frac{5}{8}$ x $\frac{3}{8}$ heifer calf. This is a very choice pair. I have already AI'd her to LMC SSC Angelo, and breeding info will be available at the sale.

The kind that can build a program. Full sister to embryo Lot 25. This powerful 3/8 Simmental, 5/8 Brahman replacement heifer combines elite, proven genetics with unlimited breeding potential. She is sired by LMC Transformer, one of the breed's premier 3/4 Simbrah sires, whose influence has been validated through both his own show ring success and the consistency of his winning offspring. On the maternal side is Shangri, a hidden gem from East Texas that is quickly approaching ABBA Register of Renown status. Her production record speaks for itself, having produced multiple winners at the International Brahman Show, including two Class Winners and the 2025 Calf Champion.

This female is the kind of replacement that offers immediate value and long-term genetic impact. With her pedigree, she can be mated to virtually any purebred Simmental sire to create fresh, new PB Simbrah, while maintaining the maternal strength, performance, and eye appeal demanded by today's industry. Invest in proven cow families, elite sire power, and a female with the pedigree to leave a lasting mark on any Simbrah program.

A mating designed to build the next generation of elite Simbrah cattle. These embryos represent the same proven mating as Replacement Heifer Lot 24, combining the power of LMC Transformer with the legendary producing ability of Shangri.

LMC Transformer is recognized as one of the breed's premier PB Simbrah sires, earning his reputation through his own show ring success and, more importantly, the consistency and quality of his winning offspring. On the maternal side, Shangri is a proven donor from East Texas that is quickly approaching ABBA Register of Renown status. Her impressive production record includes multiple winners at the International Brahman Show, highlighted by two Class Winners and the 2025 Calf Champion.

This mating offers unlimited potential for both the show ring and the pasture. The resulting progeny will be 3/8 Simmental and 5/8 Brahman, providing exceptional flexibility to advance any breeding program. Selling 3 SEXED IVF FEMALE embryos and giving a 4th one as the guarantee. Bid with confidence, I've had an 82% conception rate with this mating and have kept several back to build my program.

LOT 27 What a deal here to acquire sexed heifer embryos that are full sibs to the likes of LMC/JSSC Augusta, Jenna Tyler's champion LMC/JSSC Darling Annabelle, and of course the impressive JSSC/LMC Magnolia female. While their ability to compete in the ring is certainly something we admire about this mating, it is the breed character, function, and desirable frame it generally results in that we like to see. These traits should drive consumer demand and improve the bottom line of the operation that ultimately utilizes this proven mating. These embryos are sired by the popular RGV DRC Paying The Bills bull and out of the profitable LMC Daydream donor. A proven mating that has worked time and again. We will be selling three IVF Sexed Heifer embryos with a guarantee of a minimum of one 90-day pregnancy if the work is done by a certified embryologist. In the case that the three embryos do not meet the guarantee, sellers will provide one additional embryo of the same mating or of equal value to satisfy the guarantee. Guarantee expires January 1, 2028, the embryos are stored at Transova in Bryan, Texas and buyer is responsible for shipping costs.

LOT 26 JSSC/LMC

Magnolia is a feature lot for us this year due to her pedigree clout, impressive phenotype, and earning potential. Her dam LMC Daydream is among the most productive and profitable donors in the breed producing numerous high sellers, as well as major champions throughout her career. Among them is Madison Culpepper's \$25,000 2018 ASA National Champion LMC SSC Yolanda, Nolan Seale's full sister to Magnolia JSSC/LMC Augusta who was Supreme Champion at the 2024 Cattlemen's Congress American Breeds Junior Show, and numerous other influential cattle. Magnolia's sire RGV DRC Paying The Bills remains one of the hottest and widely used bulls in the breed and was recently acquired by the Petrus Family. This popular LLSF Pays To Believe son out of Triple C and Chappell's famous RGV LMC Dr. Beauty donor traces back to the legendary LMC EF JW Black bull who added as much consumer demand to our program as any. Magnolia's genetics are destined to be a cornerstone in our program for years to come due to the efficiency, marketability, and totality these cattle bring to the table. We believe this will be one of the prime opportunities of the year to add a legitimate donor prospect to your program. Magnolia was exposed to JSSC/N Big Block 454M (ASA# 4505105) from 4/4/26 – 5/4/26 and to LDJA Home Town L550 (ASA# 4374957) from 5/10/26 – 6/1/26.

Congrats to the 2026 honoree **LA MUÑECA CATTLE CO.**

The La Muneca Story by Carlos X. Guerra

I would like to start by thanking our ancestors for having the foresight to invest in land in the late 1800's and early 1900's. My widowed great grandmother, Antonia came from Mier, Mexico in the early 1870's looking for a better life for her family. My grandfather Arcadio was a young teenager at the time. Our La Muneca brand was registered in 1873 by our great grandmother. We are extremely proud to still be branding our cattle with this world renown brand today. They started investing in and improving ranch land across south Texas. A big hearty thanks to Mom and Dad for their support and for giving us the opportunity to continue ranching in the Guerra tradition.

We started in the Polled Registered cattle business in 1963 when my dad, my brother Felo, my Tio Mike Chapa and our dear ole buddy Scott Martin went to Cotulla to invest in some Red Angus pairs from Mr. E. R. Cotulla. My first 4-H project, a bull named Pancho, was in this group of nine pairs. I have been actively involved in registered cattle, 4-H, FFA and helping our youth ever since. I am blessed to live a dream life doing what I have always dreamed of doing.

We have bred Red Angus, Red Brangus, Red & Gray Brahman, Indu Brazil, Gyr, Sardo Negro Zebus, Gelbray, Simmentals, Braunviehs, Polled Brahmans, Simbrahviehs, and Simbrahs along the way. The best part of this experience has been the many solid relationships that we have built through the years. In the registered cattle business, you will have the opportunity to meet some of the finest folks on earth. The most rewarding experience has been seeing our cattle work for

others with them coming back for more plus working with our youth from the local to national level.

We have been in the Simbrah business since the mid 1980's. In the early 80's, the Godfather of Simbrah, Bud Wentz, and my Tio Dr. Lauro Guerra urged us to utilize Simmental in our Red Brahman program. We eventually built us a herd of Simbrah cattle with a Red Brahman base that we are still proud to work with today.

La Muneca is a family owned and operated business that started in 1989 when my wife, Sister and our four children bought out the Guerra Bros. registered cattle. We did not have any operating money, but we financed the cattle through Guerra Bros. and our operating line with Bruce Kroeker. We weaned the calves, fed them for one hundred days and had our first production sale in January 1990 and have not looked back since.

The Simbrah breed has been a major component of our business since 1989, and we believe in these cattle. Labeled, "The World's Breed," Simbrah is a versatile American breed that is a 5/8 Simmental x 3/8 Brahman cross that can adapt and survive in various climates. When you take the hardiness of the Brahman breed and couple that with the carcass value and milk of the Simmental breed, we found Simbrah to be ideal for our environment, as well as market here in south Texas.

Due to the limited amount of semen available on 3/4 Simmental x 1/4 Brahman bulls to artificially inseminate to F-1 Simbrahs, we chose to breed our Red Brahman cows to the best F-1 Simbrah bulls money could buy to produce 1/4 x 3/4 females. We

bought F-1 bulls from the Lundgrens in Washington to Colville Jackson in Mississippi. Most were sired by the popular champions Bravo and Mayro 257. By doing this, we were able to select from hundreds of Simmental bulls to breed to our 3/4 Brahman females to produce 5/8 Simmental x 3/8 Brahman (Purebred Simbrah) cattle.

We are proud to be heavily involved with the juniors and have an extensive junior program here at the ranch. We co-founded the popular Simbrah-Simmental Superbowl along with Tim Smith and Billy Wentz in 1992. This annual event now held during the San Antonio Junior Heifer Show in San Antonio, Texas has awarded over \$1 million dollars in premiums to the hard-working youth exhibiting Simbrah and Simmental cattle.

We will host our 39th Annual LMC Jr. Round Up & Futurity this fall which is an all-day family oriented, fun, and educational field day open to 4-H and FFA members and their families for free. We also founded MAS (Marketing American Simbrah), the LMC Jackpot Show, and the TJSSA Scholarship program. We are always looking to create leadership, educational, and scholarship opportunities for our Simbrah juniors to grow this great breed of American cattle founded in the late 1960's.

Our cow herd today primarily consists of Polled Gray & Red Brahman and Simbrah cattle. We have an extensive embryo transfer program within both of our breeds. We offer semen on all our bulls year-round and consign our best genetics to numerous auctions throughout the year including the American Nation, Back to Grass, and Fall Fest sales. Our world-renowned herd bull battery features several National and International Champions, as well as champions from the annual Rio Grande Valley Beef Improvement Association's Performance Bull Test which our son Carlitos is actively involved in.

We have been testing Polled Brahman and Simbrah bulls annually for several years in the RGVBA's Performance Gain Test to accumulate useful data to utilize as well as provide to our customers. These bulls generally sell private treaty during the test which runs from October through February. All of our bulls come guaranteed fertile. We appreciate all the cattlemen who have trusted our bulls through the years. We have sold our Simbrah genetics to numerous continents, several countries, and over fifteen states.

Our show heifer market remains strong, and we have been blessed to be competitive at every level. We primarily offer our show heifers private treaty as well. Several of our heifers that sell are products of our embryo transfer program featuring some of the freshest and most proven genetics in Simbrah. Our LMC Juniors have won every major show in Texas, the Superbowl and junior nationals.

See more about our junior program and former champions on our website. We also sell replacement females year-round as well.

ASA makes it possible to introduce new Brahman and Simmental blood to Simbrah to freshen the gene pool which we do on an annual basis. Our family is extremely proud that Victor is the immediate past President of the American Simmental Association and appreciate all that the ASA has done to assist us in improving our Simbrah cattle. Our progressive Polled Brahman program has been an asset to this venture with the best yet to come as we utilize some of the best Simmental sires going as well to improve our EPD's.

On a personal level, Sister and I continue to be involved with volunteer organizations like The Brahman Foundation, Linn San Manuel Community Improvement Committee, various scholarship programs, and our church but are slowly turning over these opportunities to the next generation

We are proud to see our kids getting involved with these organizations, as well as several others including the Texas FFA Foundation, Texas Junior Simmental/Simbrah Association Education Trust, American Junior Simbrah Roundup Scholarship Committee, Hidalgo County Farm Bureau, STAR, Rio Grande Valley Livestock Show, and many more.

We are proud to have raised all four of our kiddos in agriculture, the 4H, and FFA, as well as St. Anne's Catholic Church. Laura is an attorney, Carlitos manages La Muneca, Victor is an attorney, as well as a rancher, and Cristina along with her husband Justin LaGrange owns a jewelry business while Justin manages a local landscape company.

Sister and I are also proud to see our six grandkids (Gabriela, Carlos "Pops," Mia, Cecilia, Justin Boone, and Sylvie) being involved in many of the same organizations our kids were and growing up around the ranch. All four of our kids graduated from Texas A&M University and two of our grandkids are currently students now.

At La Muneca, every day is sale day. We are excited about our cattle and look forward to sharing them with you. Visitors Are Always WELCOME at La Muneca, where a positive buying experience is Guaranteed.

In closing, we would like to extend A BIG HEARTY THANKS to all our buyers and supporters through the years with a Special THANKS to the East Texas and Heart of Texas Simmental/Simbrah Associations for this honor. It has been both a blessing and a pleasure to have our paths cross with so many of you.

May God Bless America and Simbrah "The World's Breed!"

1.) Carlos (left) with the "Godfather of Simbrah" Bud Wentz (middle) and his brother-in-law Dr. Ernesto Guerra of BETM Ranch. 2.) Carlos & Sister with some of the LMC Field Day participants at La Muneca. 3.) Great Grandmother Antonia Guerra. 4.) Mackenzie Groce and Caleb Fuchs with their LMC Gold Medal daughters sweeping the competitive 2018 San Antonio Junior Show.

Boening Bros. & La Muneca Lot

28 LMC BBS LORI 5N/36

LMC BBS Lori is also a feature lot in our offering due to her donor potential, length of body, and structural integrity. A product of our extensive embryo program, Lori represents a fresh mating with her sire being the many times champion LMC VG Go Getter bull who

was a good looking LMC EF JW Black son out of a LM Full House daughter bringing in the famous HR Power House I bull. On the bottom side her dam LMC BBS LR Scarlett is sired by the 2013 National Champion LMC Gold Medal bull and out of the LMC BBS Andrea donor, making Scarlett a full sister to the 2024 National Champion LMC BBS Red Dynasty bull. She represents the LMC WFC Ms Dream Girl and BBS Jennie Walker cross that has been a steady force in our program for many years now. Let this built in promotion and predictability go to work for you in your program and we are confident you will be satisfied you did.

Lori will be artificially inseminated or exposed prior to the sale and we will have updated breeding information in the sale supplement sheet and/or from the auction block on sale day.

La Muneca Semen Lot

This package here features five of our better-end red blazed-faced Simbrah bulls including a new bull that Carlos Jr. is especially fired up about. LMC BBS Pacifico is the new kid on the block and has a stellar pedigree being sired by the legendary Mr HOC Broker bull and out of the 3/8's Simmental 5/8's Brahman donor LMC BBS Ryann. After that we get into some proven sires in the 2011 National Champion LMC Arcadio bull, his impressive son BETM LMC Rafa, and the 2019 Reserve International Champion Bull LMC San Pepe. We round out the lineup with Ava Vela's 2021 Reserve Champion Bull at the American Junior Simbrah Roundup RGV LMC Mr Worldwide and you have a solid set of Purebred Simbrah bulls to utilize in your program several different ways.

Selling 2 units a piece on these five different bulls with the buyer having the option to double their final bid and purchase a second package. Semen is stored at Brushy Creek Sires, and the buyer is responsible for shipping costs.

N/LMC Beauty Queen represents the initial offering of progeny out of the many times champion LMC/JSSC Augusta donor and one that we contemplated at length about letting go of. After a productive first flush for Augusta and in honor of the recognition that we have been blessed with this year, we decided to share this promising female as part of what

we believe to be a deep offering from our program. Her sire SLBC JSSC Red Hot has caught the attention of numerous breeders due to the quality of his first calf crop, which includes the promising herd sire prospect JSSC/W/LMC Pacino who Waylon Seale led to numerous championships this summer. Beauty Queen is well balanced, excels in breed character, and should add eye appeal to your operation. She has a desirable disposition and frame score, as well as impressive udder promise. Do not let that chrome deter you, as the boss man always says, "the best color is spelled g – o – o – d."

Beauty Queen was exposed to JSSC/N Big Block 454M (ASA# 4505105) from 4/4/26 – 5/4/26 and to LDJA Home Town L550 (ASA# 4374957) from 5/10/26 – 6/1/26.

LA MUNECA CATTLE CO.
& LA NEGRA CATTLE CO.

LMC BBS Rambler is one of the best looking red Simbrah bulls we have ever produced, so it is only natural that he would be the product of two of our more popular cattle. His sire is the 2013 National Champion LMC Gold Medal bull, and his dam BBS Jennie Walker won the coveted \$10,000 San Antonio scholarship for our partner Kayla Boening. Combined, the impact of Rambler's sire and dam cannot be overstated when you put together all that their progeny have accomplished. Rambler should add performance and style while not sacrificing natural muscle. Rambler sired both the National and Reserve National Champion Simbrah bulls in 2023 for the Mullins and Mayes families. He is also the sire to Lee's Cattle Company's LMC LN Maximilian and Sklar & Son's LMC Eagle One bulls that are both the Cowman's Kind of herd bulls working for those respective operations. The semen is stored at Brushy Creek Sires, and the buyer is responsible for shipping costs.

LA MUNECA CATTLE CO.

LMC SSC Antonio brings a lot of traits that we like to see in our herd bulls to the table, including a dam with a near flawless udder and impressive production record. This LMC Daydream son is a full brother to LMC SSC Angelo, LMC SSC Catalina, and LMC SSC Yolanda, three individuals who have generated a lot of consumer demand for our program. His sire LN LMC 12th Man was the National Champion Percentage Simbrah Bull in 2012 and sired the likes of LMC BBS Jazmine, LN Brooklyn, and 3JP Who Dat. Antonio is one of the smoothest made bulls in our semen lineup yet stays loaded with natural muscle and style. His daughter LMC Walk This Way is a donor in the Higher Up program and one of Victor's favorite cows here at La Muneca is a young 3/8 Simmental 5/8 Brahman cow sired by Antonio as well. We believe he is a calving ease option, and the best is yet to come for this impressive sire. The semen is stored at Brushy Creek Sires, and the buyer is responsible for shipping costs.

RGV/LMC The Specialist has quickly become a popular commodity around here due to his ability to sire calves with loads of eye appeal and natural product. This LMC BBS Skywalker son is easy fleshing and has been busy breeding cows since he came of age. We are impressed with his drive and fertility, especially since he had to have a testicle removed due to injury. His dam RGV Painted Beauty was a division champion at the San Antonio Junior Show for Olivia Vela and is a capacious, stout made female that also produced the RGV LMC Mr Worldwide bull. The Specialist's pedigree is a who's who among the Simbrah breed with the likes of BBS Jennie Walker, LMC ATZ Dr. Feel Good, and ZZ Crimson Beauty in the fold, among numerous other marquee names. We are fired up about this bull, and you will be seeing a lot of him as his progeny goes into production. We believe he will go down as one of the greats once it is all said and done. Thus, bid with confidence here as we are confident he can work on a lot of different types of cattle due to his complete and balanced build. The semen is stored at Brushy Creek Sires, as well as Elgin Breeding Service and the buyer is responsible for shipping costs.

5/8 SIMMENTAL X 3/8 BRAHMAN

LMC Carolina is a capacious, easy-going, and eye-appealing heifer with plenty of potential due to her pedigree, as well as her high-quality look. Her sire RGV/LMC The Specialist is a LMC BBS Skywalker son, out of RGV Painted Beauty who is a full sister to the popular RGV LMC Dr. Beauty donor. She carries the influence of LMC ATZ Dr. Feel Good, BBS Jennie Walker, and the legendary CNS Dream On, on the top side. On the bottom side, her maternal grandsire LMC Icon is our go to calving ease sire that is sired by the Denver champ FBFS Wheel Man and out of the profitable LMC Daydream donor. Carolina's maternal grandmother is an LMC MT Transformer daughter out of a LMC WFC Ms. Dream Girl donor. We produced this female with our good friends the McGurk Family and she sells with two free units of semen on select La Muneca bulls to choose from to AI her to.

BW: 67 | 205 WT: | 5/8 SM 3/8 BR

RGV Cattle and Reavis Farms have teamed up to offer you this great homozygous polled, heterozygous black fancy show prospect. She is a December born babydoll out of the great RGV DRC Paying the Bills bull whose progeny are in high demand. Her dam is a first-time heifer that is one of our favorites, Hidden Gem, that is sired Smith RFI Ready or Not. Ready or Not goes back to the well-known sire, LMC EF Johnnie Walker Black and the great LMC Diva cow – both have produced big time progeny. This female will be highly functional as both a show heifer and cow. She is ultra smooth, big bellied, and as thick as they come while maintaining her femininity and cat-like movement. She comes fully halter broke and DNA parentage verified. She is eligible for the San Antonio Superbowl show as well. All the guesswork has been taken out! Take the lead of this heifer and lead her to the backdrop!

Four Sevens Texas Raptor is a deep cherry red, polled, non-dilutor herd sire prospect with exceptional power and eye appeal. Big-hipped, deep-bodied, and structurally sound, he is a true standout in the pasture. His pedigree is stacked with proven genetics. On the top side, he traces to Anchor D Raptor and JS AD Panzues

D203. On the bottom side, he is backed by FSS Maximus, LCF Winsome 690W, and Sunny Valley Sargent, combining performance, maternal strength, and longevity.

With a balanced set of EPDs and the phenotype to match, Four Sevens Texas Raptor offers the complete package. We believe he has all the qualities to be an outstanding herd sire and make a lasting impact on any breeding program for years to come.

BHR BECKY Z195

BW: 90 | FB SM

RTOP Ms Iris is the second T5 Texas Raptor daughter in my offering. She is 6 months younger than her half sister Belle. Iris is a moderate frame female with more than adequate growth and milk. She is bred to SD Marcus, a black purebred Simmental for her first calf. The calves that Marcus has produced have come small but developed extremely well. Iris's calf could be red, very exciting. Don't let this one miss a good long look sale day!

BW: 89 | FB SM

RTOP Ms Belle is one of two T5 Texas Raptor daughters that I am offering in this year's sale. Belle is the epitome of what you can expect Raptor to produce. Belle's genetic package dives deep into what I have been working on for years. Her grand Dam, RTOP Memphis Belle, was one of my top cows before her passing. She has two full sisters still in the herd today in production. Belle is confirmed bred to her Sire, T5 Texas Raptor, with the goal to establish a new polled genetic line with tremendous consistency. The calf will be polled and a non-dilutor. Due shortly after sale date. Seller retains the right at buyer's convenience to one IVF flush.

NAVY is a special bred heifer, in my opinion. She has length of spine, a strong top line, excellent hip structure, tremendous depth of rib and it's all set on a solid foundation of genetics. Sired by SOT JETTER, a Raptor son out of BHR Samantha, the moderate framed donor that gives you that thickness from Dusti and of course Doorn along with the maternal traits from Smithbilt Molson, Sunny Valley Sargent and DFM

Marcus. Her dam JS F217 is sired by Brink Calvin and her dam is a Siegfried out of BHR MONA's Express, that is an Xpress daughter out of Mona the Bold, Argonne Hackenberg cow from Little Creek farms.

The numbers speak for themselves, nothing exceptional one way or the other just solid from one end to the other and that best tells you what NAVY is.

NAVY sells bred 71 days on 6-16-26 to an AI date of 4-03-26 to APLX Coach due 1-16-27.

TI	65.2

NALA is a SOT JENSEN daughter out of BHR Fairy, a Maximus out of a Dustin daughter that goes back to what I believe is one of the top 5 cows in all of South Africa, KYKSO Pedodi. NALA, dam is SOT ACTIVE TRADE, a Radioactive daughter out of BHR Tradewind that traces back to C&B Western, Z O Niner, Antonious, Elsa Classic and Lettimars Elsa.

NALA has tremendous depth of rib, great topped, smooth shouldered, excellent hip structure and will build a tremendous udder with perfect teat placement. Don't know where the milk EPD came from but it's wrong.

NALA carries a pedigree that is 65% maternal and 35% paternal and is palpated safe to the 4-03-26 AI date to APLX Coach that will increase the maternal part of her pedigree to 85%. Due to calve on or about 1-16-27. You sure don't want to miss this female, and her calf will stand a chance to be homo polled.

64 SOT NADINE N107

#3809836 BHR LADY SIEG C235E

BW: 80 | 205 WT: 660 | FB SM

YES, SHE HAS A LOT OF CHROME, now we can get down to what really matters. SHE IS GOOD. Look at the top line, depth of rib, smoothness in the shoulders, hip structure and red meat expression and see if you don't agree.

Sired by Southseven Polled Perfection that brings an entirely new set of genetics into the SOT program, but one that offers a tremendous set of numbers based on a proven pedigree. The numbers that tell you what to expect are the API and the TI with both in the top 2% of the breed. NADINE's dam is SOT HENERITTA H051, a Halling daughter out of a Siegfried, BOLD daughter that traces back to a Hackenburg and Argonne daughter. POLLED PERFECTION was selected to enhance the numbers of H051 and offered a new set of genetics to an old proven pedigree. NADINE is ultrasounded 60 days safe, to S/M Milestone, on 06-16-26. Milestone is a homo polled non dilutor Kuntz Kingpin son that ranks in the top 2% for API and top 1% for TI but calves easy with a lot of performance. You are going to love this calf.

65 SOT NADIA N105

TATTOO: SOT N105 | ASA#: 4573746 | DOB: 1/6/2025 | P | SIMMENTALS OF TEXAS -1

SIRE SOT JUDSON J713 { BHR ELI E560E
#4051347 BHR LADY SIEG C235E

DAM BHR KEONA F169E { BHR ORANGE RIVER G558E
#3620090 LADY SIEGFRIED KEONA

BW: 83 | 205 WT: 622 | FB SM

NADIA is a combination of German, Austrian and South African genetics, that combines Siegfried in the top and bottom side of the pedigree. If you study the old proven pedigrees, you will find what I call the 1, 3, 5, & 7 breeding scheme, where a sire shows up in the first generation on the top side and then shows up in the third generation on the bottom side and so on down the pedigree.

NADIA is sired by SOT JUDSON, a BHR ELI son out of BHR Lady Siegfried, add to this pedigree C&B Western, Z O Niner, Anchor T Legend, Bold and Hackenberg and you have a perfect blend of maternal and power genetics. NADIA's dam is sired by BHR Orange River, a Magnum son out of what I believe is the best cow ever produced in Sout African, Congosim Susi, a Hagan daughter out of Voightland Selli 71. Add to that Jungle, Lady Pretoria, Congosim Selli and KYKSO HADAU and you get a complete package.

NADIA sells bred to APLX COACH to calve on or about January 16, 2027, and what a calf that should be.

SOT will retain the right to one viable flush on NADIA at the convenience of the buyer and at SOT's expense.

TI	69.5

MERRITT's dam is a 1/2 sister in blood to SOT Awesome Winsome J715E and Estes Top Gun and the air apparent to her dam, LCF 690W, as the next generation of donors at SOT. I don't believe we need to spend time and space discussing BHR EBONY E127 because she is a carbon copy of her dam in type and production.

MERRITT signals the next generation of Fleckvieh genetics. Her sire SOT JUDSON J713 is a true blend of

power with sires like: C&B Western, Canadian Neff, Cajun Neff, Bold, and Hackenberg. The maternal side, of his pedigree, is just as impressive: Anchor T Legend, Z O Niner, Siegfried, Argonne, Smithbilt Molson and a touch of power from BHR Doorn and Dayton's Pol Neumann.

Merritt sells bred to S/M Milestone M102, due 1-27-27, a Anchor D Raptor son, making her calf a double bred Raptor by adding Raptor on the top side and linking sires like: Dirty Harry, Crossroad Radium, Anchor T legend with just a touch of BHR Doorn to add the power. SOT retains the right of one viable flush at the convience of the buyer and at the cost of SOT. Don't miss this exciting package.

MILA combines a pedigree of calving ease, maternal calving ease, stay, marbling and API into a single package on a moderate framed female with length of spine, smooth shouldered and all set on a functional set of feet and legs. Her Fleckvieh pedigree is a blend of maternal genetics from: Smithbilt Moson, Raptor, Sunny Valley Sargent, DFM Marcus, SH Romulus, with power from Dayton's Pol Neumann, BHR Dustin and BHR Doorn, Rogar and Overhall Hivy.

MILA brings a little different twist to her package. AI'ed on 2-12-26 to APLX Coach and then on 3-03-26 to 06-16-26 was cleaned up with a black bald face PB Simmental bull whose pedigree traces back to IR MS FENELLA U028, a Siegfried Grand Daughter, and a full fleck sire that traces back to BHR Tradewind T119 and if you follow that back you will find Lettimars Elsa.

On 06-16-26 MILA was ultrasounded bred 70 days to calve on or about 1-17-27 to SOT M568, ASA 4397909. What an outstanding package with the chance to play in the PB Simmy field or breed her back to a full Fleck, the choice is yours.

Celebrating THE LIFE OF BILL TRAVIS

Bill and Jane spent four decades dedicated to breeding a unique line of Simbrah beef cattle, which he described as “the ultimate hot-weather cow.” As owners of Pine Ridge Ranch for more than 40 years, they genetically refined their cattle by selecting for red coats, dark skin, polled genetics and blaze faces, as well as other important production traits.

Bill and Jane traveled the world promoting their cattle and selling their genetics. Bill had a passion for his cows and the cattle industry that couldn’t be beat. In 2017, Pine Ridge Ranch received the Golden Book Award from the American Simmental Association. It can truly be said that Bill “never met a stranger and was a friend to all.”

Jane and daughter Diane will carry on his legacy.
